## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Thomas (5,006,952; Applicant submitted).

Thomas discloses a substantially rigid, force-sensing joystick, comprising:

a handle 12 (figs. 1-3);

conductive drive plate 22;

segmented conductive surface A-D (on 28); and

force applied to the handle causes deflection of the plate 22 (see fig. 1).

Regarding claim 2, Thomas discloses four segments, see fig. 2.

Regarding claim 4, the plate 22 is non-segmented. Further, the conductive surface A-D is a part of a printed circuit board 28.

Regarding claim 5, the surface A-D requires no soldering connection to the circuit board (see col. 3, lines 10-40).

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see PTO-892.
